Re: Front-End Developer Intern

Dear Hiring Team at Interact Corp,

I am writing to express my interest in the Front-End Developer Intern position at Interac Corp. I will be graduating in May with an Advanced Diploma in Computer Programming and Analysis from George Brown College. I am eager to contribute my technical expertise, passion for innovation, and collaborative mindset to the team at Interac.

Through my academic and project experience, I have built a strong foundation in front-end technologies. I developed a financial budgeting mobile application using React Native, implementing key features like authentication, budget planning, and expense categorization. This project honed my skills in Agile development, version control with Git, and problem-solving. Additionally, I designed a microservice-based room booking system with Spring Boot and Docker, reinforcing my understanding of API integrations and system scalability. I am proficient in HTML, CSS, JavaScript, with hands-on experience in frameworks like Angular and React, and libraries like Bootstrap and Materialize. My familiarity with tools such as Visual Studio Code, IntelliJ IDEA, and Git, coupled with my understanding of Agile methodologies and secure code practices, aligns well with your internship requirements.

In addition to my technical proficiency, I bring 5 years of experience in retail, where I honed strong communication abilities, adaptability, and a customer-centric mindset. My 2 years of managerial experience further refined my leadership skills and organizational acumen. Currently, I worked as a Laboratory Attendant, managing health records and supporting technical processes, which has strengthened my attention to detail, problem-solving abilities.

Thank you for considering my application for the Front-End Developer Intern position. If you have any questions or need further information, please feel free to contact me at trang.nguyen3@georgebrown.ca.

Sincerely,

Trang Nguyen
