Dear Hiring Team,

I am writing to express my interest in the Front-End Developer position. I will be graduating in May with an Advanced Diploma in Computer Programming and Analysis from George Brown College, and I am excited about the opportunity to contribute my technical skills, enthusiasm for innovation, and collaborative mindset to your team.

During my studies, I've had the opportunity to work on projects that not only refined my technical skills but also deepened my appreciation for creating user-friendly applications. For my capstone project, I developed a financial budgeting mobile application using React Native, where I implemented features such as user authentication, budget planning, and expense categorization. This project not only helped me enhance my technical skills but also taught me how to collaborate effectively within Agile frameworks, manage version control with Git, and problem-solve under pressure.

Beyond my technical expertise, my five years of experience in customer-facing roles have shaped my approach to development. Working as an Assistant Sales and Operations Manager, I led a team that managed a retail store generating \$10M in revenue annually. I coached sales associates to enhance their performance and customer satisfaction. This role reinforced my ability to communicate clearly, work collaboratively, and think creatively to improve processes. I believe these interpersonal and leadership skills will help me contribute effectively to a development team and ensure the applications we create are both functional and user-friendly.

In my current role as a Lab Attendant, I've strengthened my organizational and problem-solving abilities. Managing sensitive health records and ensuring data accuracy has taught me the value of precision and attention to detail, which I know are essential when developing secure applications. This experience has reinforced my commitment to building high-quality solutions that prioritize both performance and security.

I'm excited about the chance to contribute to your team and apply my skills to help create innovative products that enhance user experiences. Thank you for considering my application. I look forward to discussing how my background, skills and passion can contribute to the continued success of your company. Please feel free to contact me at [trang.nguyen3@georgebrown.ca](mailto:trang.nguyen3@georgebrown.ca).

Sincerely,

Trang Nguyen
